23 July 2003

Dear Mr Kruger

RE: FIRE SAFETY REQUIREMENTS: ABSA STADIUM

Our meeting and inspection dated 22 July 2003 refers;

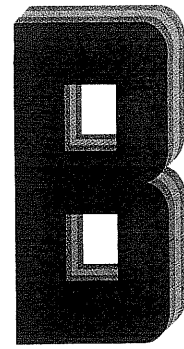

At the time of the inspection the Absa Stadium Durban, which is proposed for use as a venue during the 2010 Fifa World Cup currently complies with all fire safety requirements.

Furthermore, we confirm that the stadium, once upgraded, will have the full expertise of this department to ensure that it complies with the fire safety requirements once the application is made.

Yours faithfully,

C MCKENZIE
FIRE SAFETY OFFICER

cc: Mr Malcolm Hamlin : 2071258

Dear Mr Blatter

Re: Financing of upgrades of the Kings Park Stadium in compliance with the list of requirements to host the 2010 FIFA World Cup

We refer to the above and confirm that the South African Football Association guarantees the payment of the costs of upgrading the Kings Park Stadium in an amount of US\$ 8,6 million (CHF 22,4 million) in order for the stadium to comply with the FIFA list of requirements for stadiums to host 2010 FIFA World Cup matches.

We advise that the South African Football Association will raise the funds from National, Provincial and Local Government structures together with Public and Private sector partners.

We trust that our confirmation meets your requirements.

Yours sincerely

M. N. Oliphant
President
South African Football Association

Cape Town Newlands Stadium

Cape Town Newlands Stadium

Name of the Stadium	Newlands
City	Cape Town
Owner	W.P. Rugby Football Union
Completion of construction	November 2007
Location	Newlands
Total lot size	80,000m ²
Number of levels	8
Seating capacity	40,000

- B.4.1 Area Plan
- B.4.2 Ground Plan Ground Floor Level
- B.4.3 Ground Plan Level 1
- B.4.4 Ground Plan Level 2
- B.4.5 Ground Plan Level 4
- B.4.6 Stadium Section
- B.4.7 FIFA Questionnaire
- B.4.8 Declaration of Undertaking
- B.4.9 Safety Certificate
- B.4.10 Construction Schedule

UPGRADING

A densely developed residential, sports facility and small commercial office and sports administration node as well as a large brewery, located in an attractive setting, constitute the immediate surrounds of Newlands.

The precinct is located approximately 10 kilometres south-east of the Cape Town city centre. The Stadium is well serviced by rail and 2 main arterial roads.

The lower standing room only areas will be converted to seating with bucket seats.

TECHNICAL DESCRIPTION OF PROPOSED MEASURES

The following new equipment will be installed or upgraded:

- ◆ A new video display board in the northern stand;
- ◆ Installation of 4 dual line electronic scoreboards;
- ◆ Upgrading of existing floodlight installation;
- ◆ Upgrading of existing public address sound system;
- ◆ Upgrading of closed circuit surveillance system.

TECHNICAL AND ADMINISTRATIVE FACILITIES

The venue operations centre will be situated in the north eastern corner of Level 4. The technical control centre where the Stadium public address announcer, scoreboard operator, video replay screen producer and technical assistants will also be situated on Level 3.

VIP AREAS

Specially secure and comfortable presidential suites and lounges are available for 500 VIPs and guests of honour, ensuring the best service. Toilets and sanitary facilities are in the direct vicinity.

SPONSOR/CORPORATE HOSPITALITY

There are 315 corporate hospitality suites that view the playing field and seat up to 7,560 guests.

There are 3 function rooms located within the Stadium which can accommodate 800 seated guests.

CORPORATE HOSPITALITY/SPONSOR VILLAGE

The hospitality areas outside the Stadium for both corporate and sponsor villages are in the direct vicinity of the Stadium and can accommodate up to 5,000 guests.

MEDIA AREAS

The Stadium will be able to accommodate the required number of Media representatives.

This will include for the following:

Written Media:

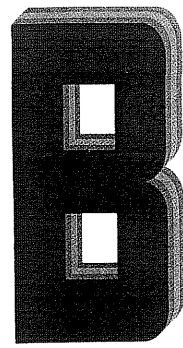

Desks	600
Tribune photographers	50

TV and Radio:

TV/radio positions	300
TV observer seats	150
Radio observer seats	125

All the above will be accommodated on the upper tier of the western stand.

The various studios will be constructed on the fourth level of the western pavillon.

Cape Town Newlands Stadium

SECURITY

The Stadium currently possesses a well secured inner perimeter, where the spectator turnstiles and corporate suite access points are currently evenly spread, with the exception of the northern inner perimeter which abuts onto a main railway line.

A temporary outer perimeter, set-up on match days, is, in view of the Stadium's location, positioned in close proximity to the inner perimeter. As with all host Stadiums during 2010 FIFA World Cup™, the Newlands Stadium precinct will be subject to the concentric rings of security system, which will incorporate 3 secured perimeters.

The location of the Stadium will dictate that the required new middle perimeter demarcation, where spectator searching will take place, will commence at the outer edge of the public ring roads which immediately border the Stadium and along the northern perimeter of the Stadium which abuts onto the railway line. A new outer perimeter will extend to a maximum distance of approximately 1,000 meters from the current outer perimeter of the Stadium.

Both the new middle and outer perimeters will be demarcated by the erection of specially designed robust temporary speed fencing. These perimeters will progressively be used to filter and screen match ticket holding spectators as they approach the Stadium.

The outer perimeter (traffic warning zone) will be used to filter pedestrian and vehicular transported match ticket and accreditation holders from the general public. This well policed, temporarily secured outer perimeter will demarcate the commencement of

the traffic-free zone. Special accreditation and screening arrangements, administered by the SAPS, will be in place for residents and vehicles, living and/or located within the traffic warning zone, on match days.

The middle perimeter, which will in the main only be located approximately 20 meters from the Stadium, will, inter alia, comprise four primary spectator search points equipped with walk-through and hand-held magnetometers where strict screening for prohibited and restricted items will take place.

A secured VIP and service vehicle screening area ('remote search park') manned by State security services, equipped with magnetometers, conveyor belt type X-ray machines and bomb detection and disposal equipment will be located approximately 300 meters from the southern inner perimeter of the Stadium. The inner perimeter will feature a minimum of 50 zoned spectator electronic ticket and accreditation verification turnstile points.

Each spectator and accredited person will be individually processed at the turnstiles. Generic, clear and visible Stadium layout ('You are here'), restricted item and match ticket condition signage will be erected throughout the entire precinct within all three perimeters.

The general spectator area of the inner bowl of Newlands Stadium will be divided into four quadrants ('zones') where FIFA approved competing team spectator separation measures, demarcating each zone, will be erected. The existing physical field perimeter security system consisting of a combination palisade fence and pitch perimeter signage hoarding barrier will be upgraded, in line with FIFA specifications, in order to fully ensure the physical safety of participating players and match officials.

The Stadium's current venue operations centre, from where the safety and security operations at the Stadium are currently directed, will be relocated to the northern side of the Stadium and upgraded into a modern facility, which will direct the entire on-site safety and security operation, on a 24-hour basis, throughout the tournament.

The venue operations centre will be equipped with the digital control system of the Stadium's current CCTV surveillance and recording system, computer equipment and peripherals, computer linked projector, electronic public address cut-in, dedicated multiple telecommunications lines and real-time data links to the electronic ticket/accreditation verification system and Cape Town's Metro Disaster Management Centre.

Newlands Stadium currently possesses a modern 8 camera, 14 colour monitor, single controller, digital surveillance and recording system which monitors the entire spectator viewing area as well as the spectator turnstile access points and public ring roads immediately behind the Stadium. Four of the existing cameras have 360° pan, tilt and zoom and low-light capability.

The system is currently linked to the Stadium venue operations centre. The system will be upgraded to cover the demarcated outer perimeter within the surrounding residential area, and will in particular focus on the four spectator screening areas situated at the middle perimeter and the primary spectator access routes to the Stadium.

The number of cameras will be increased by a minimum of 10, the number of colour monitors to 8, and the number of controllers to 4. The control system will be installed in the relocated venue operations centre and will have a real-time video/audio link to the Cape Town Disaster Management Centre.

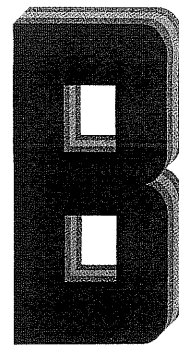

Finally, biometric face recognition software will be loaded and integrated into the Stadium's planned CCTV system to enhance the proactive surveillance capabilities of the safety and security personnel.

Each checkpoint will have an electronic ticket and monitoring system ensuring that only spectators entitled to admission can pass through.

The existing CCTV System will be upgraded. After modernisation, the entire Stadium and its immediate surroundings will be monitored by remote-controlled cameras. Eight cameras will be placed inside the Stadium and eight cameras will be placed outside the Stadium in order to monitor the surrounding areas.

These cameras will be operated from and monitored by the security and police operations centre. Images will be recorded in both digital and VCR format.

Selected frames can be printed. All games will be recorded on tape and will be documented and stored in an archive system.

Cape Town Newlands Stadium

STADIUM EQUIPMENT

Public Address Sound System

After upgrading, the Newlands Stadium will be equipped with a distributed zoned public address system for all public address and announcements including voice evacuation. It will be possible to select individual and/or combinations of zones.

Master control units will be installed in the Stadium manager's office, the technical operation centre and the venue operations centre. The master control unit in the venue operations centre will take priority at all times enabling non-delayed override. To ensure uninterrupted operation, the master control unit will be placed on an uninterrupted power supply.

The public address system will be linked to the broadcast compound area as well as the video replay screen to enable both the audio and visual aspect of flash/field interviews and advertisements. The public address sound system will also cover the gating perimeter of the Stadium.

Electronic Scoreboard and Video Replay Screen

As part of the Stadium upgrade, Newlands Stadium will be equipped with one new combination high-resolution LED video replay screen and LED full matrix information board. This board will be utilised as a real time multimedia communication system, displaying text, graphics and video material. Team details, player profiles, electronic advertising videos, match replay action, highlight packages of previous matches and safety and security information will be some of the information relayed to the spectators.

In addition four dual line LED scoreboards will be installed to cover the match score. The new installation will also include the software and all video production equipment. The production team and technical assistants will be situated in the technical operation centre.

Floodlights

The floodlighting system will be upgraded to a light intensity of 1,500 lux.

Emergency Power

Newlands Stadium will be equipped with a distributed emergency power system in order to ensure that all essential systems will remain functional in the event of a power failure. Essential systems include the venue operations centre, the technical operations centre, the fire detection and protection systems, security and access control systems, voice evacuation systems, closed circuit video surveillance systems, floodlighting system and general emergency lighting for safe evacuation purposes.

PUBLIC CONVENIENCES/REFRESHMENT

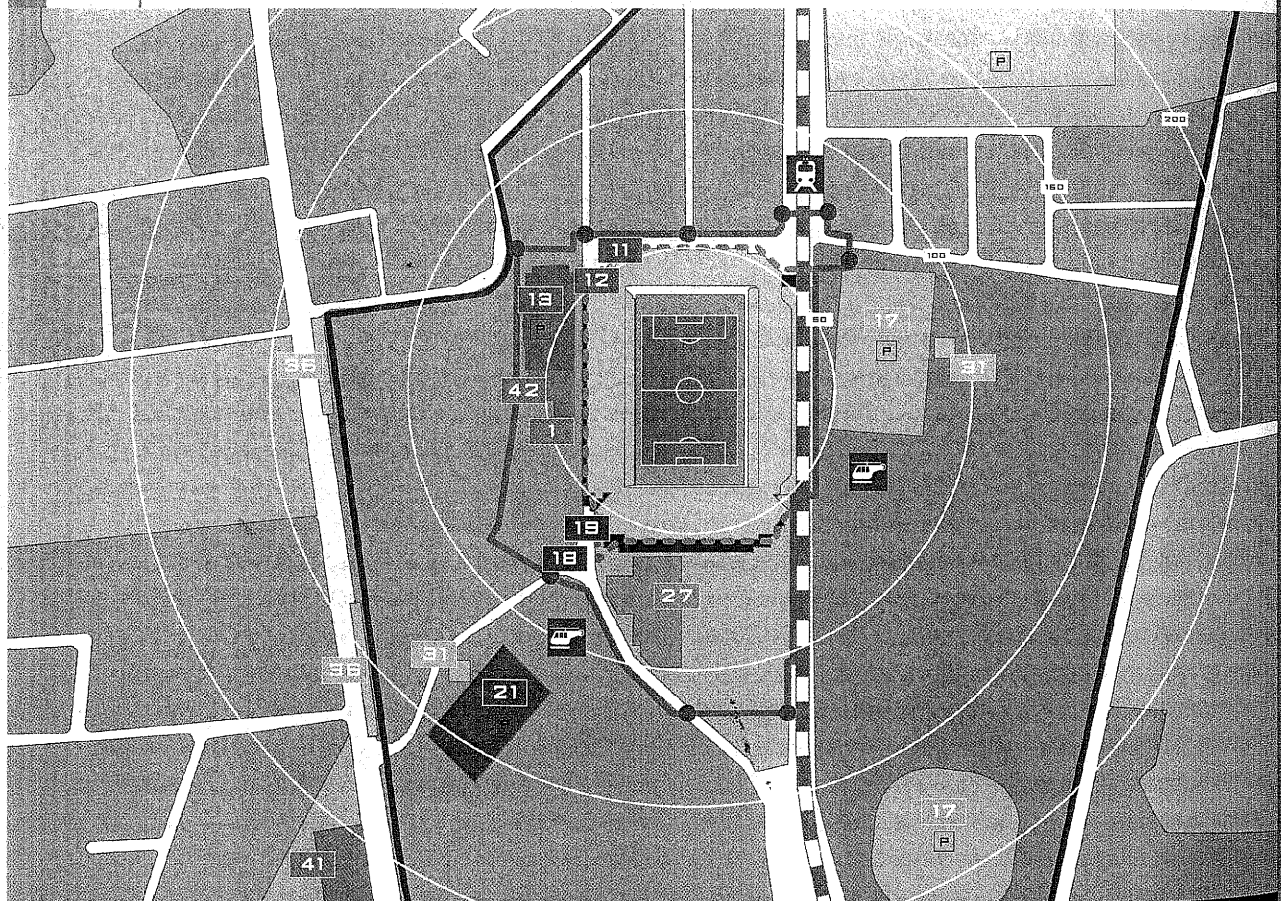

STALLS/FIRST AID POSTS

The public conveniences and concessions facilities will be upgraded to conform to international best practice.

FINANCING

The renovation of Newlands will cost approximately CHF 6.0m (USD 2.3m); and will be funded by the South African Football Association.

Dear Mr Blatter

RE: PUBLIC SAFETY REQUIREMENTS: NEWLANDS STADIUM

It is hereby confirmed that according to our most recent records, Newlands Stadium, which is proposed for use as a venue during the 2010 FIFA World Cup, does comply with all existing public safety requirements and meets the necessary national building regulations.

Furthermore, we confirm that the Stadium once upgraded will similarly comply with all public safety requirements and the necessary national building regulations.

We trust the above meets with your approval.

Yours sincerely

GERT BAM
DIRECTOR OF SPORT AND RECREATION
